Skills

- ☁ Kubernetes, Docker, Helm, AWS, OpenShift
- ⚙️ Linux, Git, GitLab CI, GitHub Actions, Jenkins, ArgoCD
- 📑 Terraform, Ansible, Infrastructure as Code, Configuration Management, Networking, DNS
- 🔗 Python, Bash, Java, C/C++, SQL
- 🗄️ PostgreSQL, MySQL, MongoDB, Kafka
- 🔌 TCP/IP, Reverse Proxy, Traefik, VPN
- 📊 Grafana, Prometheus, Elastic-Search, Monitoring, Observability, Logging
- 🖥️ REST APIs, FastAPI, Flask, Node.js, React

Education

- 📖 DevOps Engineering school at InfinityLabs R&D 2025
- 🎓 B.Sc. in Computer Science – GPA 82 at The Open University of Israel
- 🔧 Mechanical Engineering At The Technion

Languages

- 🇮🇱 Hebrew - floweret
- 🇬🇧 English - floweret

WORK EXPERIENCE

Elbit Systems Ltd.

DevOps Engineer

2026 – PRESIDENT

PresidentWork as a DevOps Engineer in an enterprise engineering environment, supporting application development and deployment processes. Develop and maintain CI/CD pipelines for automated build, test, and deployment workflows. Work with containerized applications and Kubernetes-based infrastructure. Automate repetitive development and infrastructure tasks using scripting and Python. Troubleshoot application, infrastructure, networking, and deployment issues across development environments. Collaborate with software developers and engineering teams to improve deployment processes and development workflows.

benetivei udi

Python Developer & Instructor

2024 – 2026

- Developed software and taught Python programming to high-school students.
- Developed a web-based IDE as part of a real-world software engineering project.
- Mentored students in programming, debugging, Git, and practical software development.
- Used Git-based development workflows and collaborated with other developers throughout the software development lifecycle.

PROJECTS

Personal Kubernetes Homelab / Infrastructure

LINUX, K3S, KUBERNETES, GITOPS, TERRAFORM, TRAEFIK, ARGOCD, TAILSCALE, ADGUARD HOME, GRAFANA

- Designed and maintain a self-hosted Kubernetes infrastructure using k3s and Linux.
- Deploy and manage applications using Kubernetes manifests, persistent volumes, services, ingress, and GitOps workflows.
- Built internal networking and service discovery using DNS, `home.arpa`, Tailscale, and AdGuard Home.
- Configured Traefik as an ingress and reverse proxy for multiple internal services.
- Use ArgoCD and Git-based workflows to manage application deployments and infrastructure configuration.
- Operate and troubleshoot self-hosted services including Jellyfin, Home Assistant, Grafana, Gotify, Bazarr, Overseerr, and other applications.

Infrastructure as Code / Terraform

TERRAFORM, INFRASTRUCTURE AS CODE, GIT

- Build and organize infrastructure using Terraform with a focus on reusable and maintainable configuration.
- Practice infrastructure automation and separation of environments and resources.
